

ART AND MATHS IN THE COURTAULD COLLECTION TEACHERS' EVENT

Wednesday 28 June 2017, 17.00 – 19.00

Join us for a tour of the The Courtauld's Islamic metalwork and Italian Maiolica ceramic collections at the Gallery and learn how exploring these objects can encourage your students to appreciate Mathematics as an inter-connected discipline with the potential for a wide range of creative applications. You will learn how craftspeople, who worked 450–700 years ago in different parts of the world, used only a ruler and a compass to generate a dazzling array of patterns to create these treasured masterpieces.

Attending teachers will receive a free **Art and Maths Resources** Pack, including lesson plans and an Art and Maths Workbook with 14 separate art and maths activities ready to use with your class.

17:00 – 18:00: Gallery tour with Francesca Herrick
The Courtauld Gallery, Somerset House, Strand, London, WC2R 0RN

18:00 – 19:00: Drinks Reception and Learning Programme Information Sharing
Seminar Room 4, Ground Floor, The Courtauld Institute of Art, Strand, London, WC2R 0RN.

RSVP: telephone: 020 7848 1058
